

VLAKFONTEIN COAL MINE

Mpumalanga, Witbank

CLIENT African
Exploration
Mining & Finance
Corporation
(SOC)

START DATE 01 FEB 2011

DURATION 6 YEARS AND 3
MONTHS

AVERAGE
MONTHLY
VOLUMES 214,000 M³

Concor Opencast Mining, has successfully completed its mining contract at the Vlakfontein coal mine. An excess total of 12.3 million m³ of waste and 7.9 million tons of coal has been removed during the contract. Concor is continuing with the drill and blast work with the client after converting to owner mining model.

Activities in the scope of work consisted of:

- Clearing & Grubbing,
- Boxcut development
- Topsoil removal,
- Drill and Blast of coal and waste,
- Load and Haul of coal and waste,
- Rehabilitation work &
- Plant Hire

Blasting operations were done delicately due to the close proximity of the mine to the N12 freeway and Transnet's oil pipeline.

In line with the company's philosophy of zero harm, the Vlakfontein Project achieved 6 years LTI Free on 01 March 2017.

"I can recommend them as a capable, knowledgeable and experienced mining contractor..."

[DAVID KOBUE, MINE MANAGER AEMFC]
